ACUTE MOUNTAIN SICKNESS

If you are not feeling well over 2500 meters, it may be Acute Mountain Sickness (AMS) until proven otherwise.

EARLY SYMPTOMS

- * Headache
- * Loss of appetite
- * Dizziness
- * Fatigue on Minimal Exertion

What to do ?

Don't go higher, rest, drink Fluids (Not Alcohol)

* Symptoms go away = go up * Symptoms get worse = go down

WORSENING SYMPTOMS

- * Increasing tiredness
- * Severe headache
- * Walking like a drunk
- * Vomitting

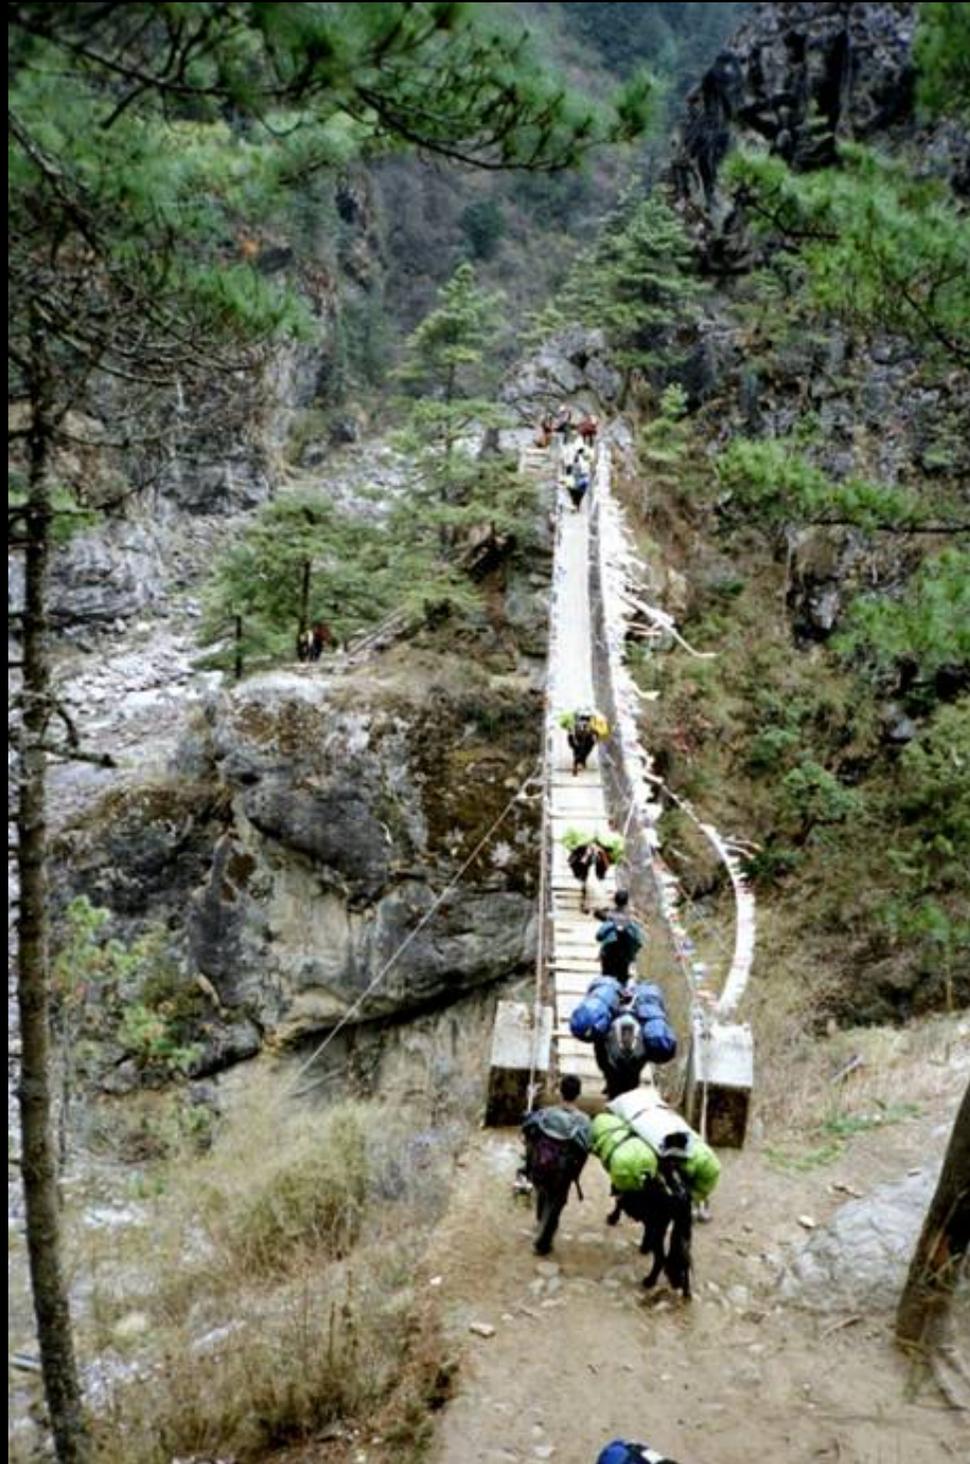

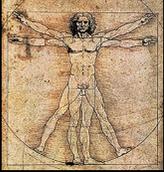

What to do ?

Descend ! Descend !! Descend !!!

Do not let any one with AMS symptoms descend alone.
